

APIs with Python

FastAPI

Great Combination of two
library

Starlette

* it manages how
your API receives
requests and sends
back responses.

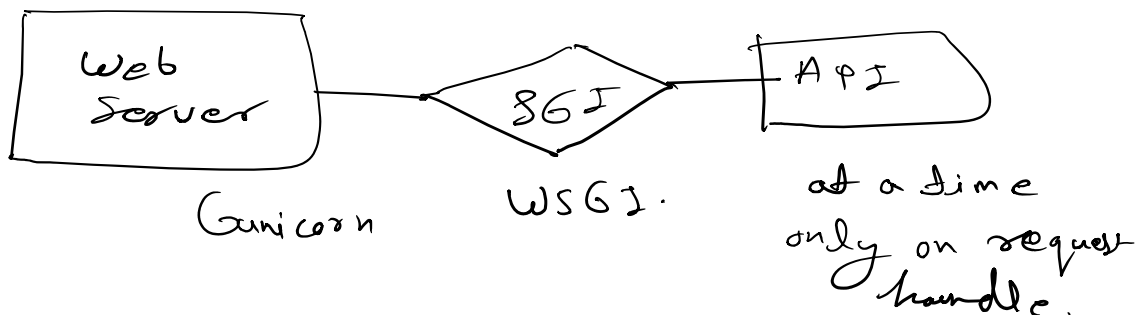

Pydantic

* Pydantic is
used to check
if the data
coming into your
API is correct
and in the right
format.

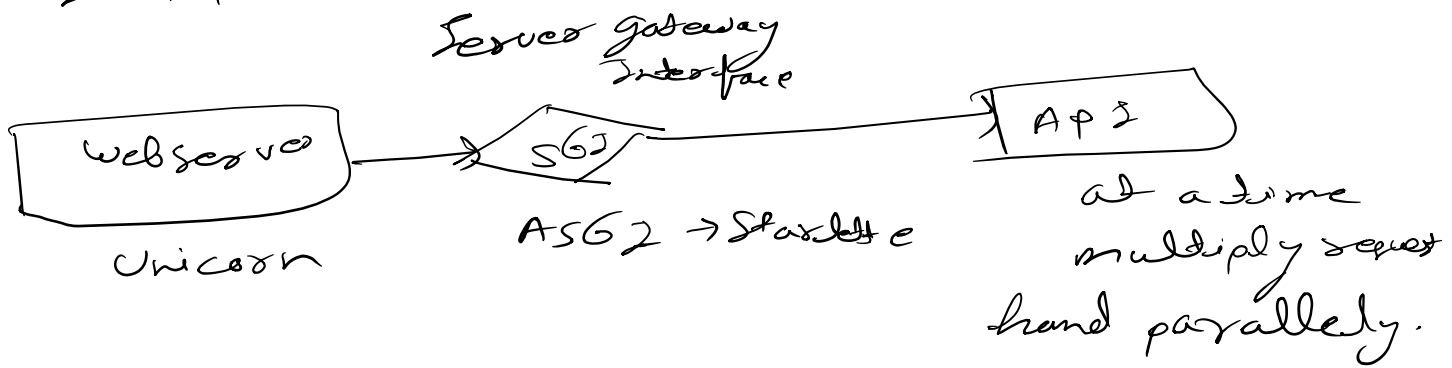

⇒ why FastAPI is fast: —

Flask VS FastAPI

⇒ Flask

⇒ Fast API

⇒ why FastAPI is fast to code?

1. Automatic input Validation
2. Auto-Generated interactive Documentation
3. Seamless integration with modern Ecosystem (ML/DL libraries OASIS, SQL Alchemy)
